

PLANS # 1 “BOXMAKING PLANS - INTRODUCTION TO SMALL JOINERY”

The project is a dovetailed box with shaped feet and a sliding lid, with variations given for a solid lid and a frame and panel lid.

This is an ideal starting point for those woodworkers new to small joinery, as these techniques can be used again and again in lots of different projects. The 40 page plans cover the one project in lots of detail - stacked with information, tips and techniques for small joinery.

Appendices include:

- Router Table Plans
- Custom Table & Fence for Drop Saw

Sliding Lid box

DVD – Boxmaking #1 50 min

A comprehensive DVD of the “Sliding Lid Box” project shows all the joinery from start to finish for the solid lid version. Seeing the techniques in action is often more instructive than reading about them! This is a very useful accompaniment to the written plans.

Available in PAL format only.
