DOVETAILING DEMO DVD 75 min

Roger has recently recorded a new 75 minute demo DVD on the Gifkins Dovetail Jig. This DVD goes through all aspects of setting up and using the jig for dovetailing, with 15 chapters covering:

- Setting up and adjusting the jig
- Cutting 4 joints for a box, covering different design situations.
- Using two stops
- Using the Variable Space Upgrade
- Changing templates
- Large work
- and more!

The DVD is packed with tips and hints, and is a must for those that want to get the most out of their jig!

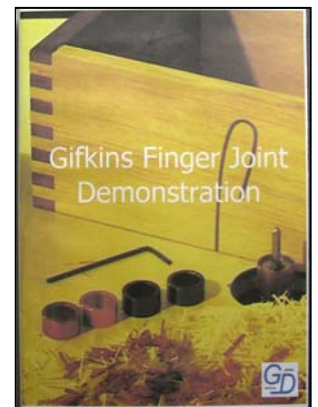

Available in PAL or NTSC format

FINGER JOINT DEMO DVD (F5 only) 25 min

The F5 demo DVD cuts a trial joint, adjusts the cutter to get that perfect fit, and then cuts all 4 joints for a simple box. This DVD uses the Bessey clamps and clamp holders, and shows how quick and easy they are to use. Whilst the F15 is not used on this demo, the cutter setup and adjustment is the same as the F5, with the cutting technique being a little quicker and easier. As a result, this demo would also be useful for the F15 finger joint template.

Currently only available in PAL format.

NOTE: As a general rule, computers will read either PAL or NTSC format. With DVD players, Australia and the UK use PAL format, whilst Canada and the USA use NTSC format. More recent DVD players will read either format.
